# ASTM Bulletins—1945

## Subject Index—Papers and Reports

A

**Acidity**
A Comparison of the Salt Method with A.S.T.M. Method for Determining the Acidity of Lubricating Oils—C. M. Loane. No. 134, May, p. 55.

**Admixtures**
Effect of Heat on Portland Cements Containing Vinsol Resin—Leonard Bean and Albert Litvin. No. 135, August, p. 30.

**Aging**
High Temperature Oven Aging of Oil-Resisting Synthetic Rubber Compounds—G. D. McCarthy, A. E. Juve, H. Boxser, M. Sanger, S. R. Doner, E. N. Cunningham, J. F. McWhorter, and R. H. Crossley. No. 132, January, p. 33.

**Air Jet Test**
Determination of Gum Values by the I.P.T. and A.S.T.M. Air Jet Gum Methods—E. L. Walters and D. L. Yabroff. No. 135, August, p. 40.

**Alloys, Non-Ferrous**
Cast-to-Size Impact Specimens for Aluminum Sand Casting Alloys—R. A. Quadt. No. 135, August, p. 24.
Compression Testing of Magnesium Alloy Sheet—A. A. Moore and J. C. McDonald. No. 135, August, p. 27.

**Alternate Immersion Test**
A Variable Cycle Alternate Immersion Corrosion Testing Machine—C. H. Mahoney, A. L. Tarr, and K. A. Skeie. No. 133, March, p. 16.

**Aluminum**
Cast-to-Size Impact Specimens for Aluminum Sand Casting Alloys—R. A. Quadt. No. 135, August, p. 24.

**Antiseptic Fabrics**
A Suggested Method for Thorough Testing of Antiseptic Fabrics—Louis C. Barail. No. 136, October, p. 25.

**Assemblies Testing**
See Simulated Service Testing

**Automobile Finishes**
Address by C. F. Kettering. No. 137, December, p. 15.

**Award**
Prize Award Established by R. L. Templin. No. 135, August, p. 53.

B & C

**Boiler Code**
Cooperation with A.S.M.E. Boiler Code Committee. No. 134, May, p. 67.

**Bonded-Wire Strain Gage**
A Rubber Housing for Waterproofing the Bonded-Wire Strain Gage—Douglas McHenry. No. 133, March, p. 18.

**Brass**
Research Revolutionizes Materials—J. R. Townsend. No. 137, December, p. 9.

**Building Fund**
List of Donors to Headquarters Building Fund. No. 137, December, p. 36.

**Cavitation**
Memo on Cavitation—Frank N. Speller. No. 133, March, p. 21.

**Cement**
Discussion of Paper on Modulus of Elasticity of Portland Cement. No. 132, January, p. 38.
Effect of Heat on Portland Cements Containing Vinsol Resin—Leonard Bean and Albert Litvin. No. 135, August, p. 30.

**Cleaners**
Metal Cleaning: I—Indirect Performance Tests—Jay C. Harris. No. 133, March, p. 23.
Metal Cleaning: II—Soil Removal Performance Methods—J. C. Harris. No. 136, October, p. 31.

**Coating Thickness Gage**
A New Coating Thickness Gage—S. Lipson. No. 135, August, p. 20.

**Coatings**
Surface-Conversion Coatings—George W. Jernstedt. No. 137, December, p. 29.

**Compression Testing**
Compression Testing of Magnesium Alloy Sheet—A. A. Moore and J. C. McDonald. No. 135, August, p. 27.
Discussion of Paper on Modulus of Elasticity of Portland Cement. No. 132, January, p. 38.
The Effect of Specimen Shape on the Compressive Strength Properties of Laterally Supported Plywood Specimens—J. A. Liska. No. 133, March, p. 33.

**Concrete**
Discussion of Paper on Modulus of Elasticity of Portland Cement. No. 132, January, p. 38.

**Conductivity**
Electrical Conductivity of Conductors—L. F. Roehmann. No. 134, May, p. 58.

**Consumer Goods**
Society to Extend Its Standardization Activities in Field of Ultimate Consumer Goods. No. 133, March, p. 5; No. 134, May, p. 6.

**Corrosion**
A Variable Cycle Alternate Immersion Corrosion Testing Machine—C. H. Mahoney, A. L. Tarr, and K. A. Skeie. No. 133, March, p. 16.
Surface-Conversion Coatings—George W. Jernstedt. No. 137, December, p. 29.

**Creep**
Relation Between Life Testing and Conventional Tests of Materials—R. E. Peterson. No. 133, March, p. 9.

D

**Die Castings**
Research Revolutionizes Materials—J. R. Townsend. No. 137, December, p. 9.

**Diesel Engines**
Address by C. F. Kettering. No. 137, December, p. 15.

**Dimensional Stability**
Dimensional Stability of Plastics—Robert Burns. No. 134, May, p. 27.

**Dissolved Oxygen**
Proposed Methods for Determination of Dissolved Oxygen in Industrial Waters. No. 137, December, p. 19.

**Dry Docks**
Preparing for Victory with the SeaBees—Rear Admiral Lewis B. Combs. No. 135, August, p. 11.

**Dynamic Testing**
Discussion of Paper on Modulus of Elasticity of Portland Cement. No. 132, January, p. 38.

E & F

**Electrical Conductivity**
Electrical Conductivity of Conductors—L. F. Roehmann. No. 134, May, p. 58.

**Evaporation Method**
Determination of Gum Values by the I.P.T. and A.S.T.M. Air Jet Gum Methods—E. L. Walters and D. L. Yabroff. No. 135, August, p. 40.

**Fatigue Testing**
An Automotive Tire Fatigue Machine—John N. Kenyon. No. 136, October, p. 9.
Comparative Fatigue Test Data—C. S. Venable. No. 136, October, p. 17.
Relation Between Lift Testing and Conventional Tests of Materials—R. E. Peterson. No. 133, March, p. 9.
Standard Fatigue Tester for Use by the Rayon Manufacturers—Report to Committee D-13—W. H. Bradshaw. No. 136, October, p. 13.
Statistical Comparison of Rayon Tire Cord Fatigue Testing Machines—C. B. Budd and L. Larrick. No. 136, October, p. 19.
A Suggested New Parameter for Fatigue Strength Analysis—Victor Seliger. No. 132, January, p. 29.

**Films**
General Properties of Industrial Radiographic Films—Herman E. Seemann. No. 134, May, p. 17.

**Finance**
Financial Highlights—1944. No. 133, March, p. 42.

**Finishes**
Address by C. F. Kettering. No. 137, December, p. 15.

**Fire-Retardant Wood**
Some Factors in the Interpretation of Small-Scale Tests for Fire-Retardant Wood—F. W. Gottschalk. No. 136, October, p. 40.

**Flexure Testing**
Flexural Properties of Plastics—W. A. Zinzow. No. 134, May, p. 31.
The Effect of Width and of Span-Depth Ratio on the Flexural Strength of Laminated Plastics—E. M. Schoenborn, George R. Proctor, and Jaime Carvajal. No. 134, May, p. 42.

**Floating Dry Docks**
Preparing for Victory with the SeaBees—Rear Admiral Lewis B. Combs. No. 135, August, p. 11.

**Fluid Aging**
A Comparison of the Effect of Reference Fuels SR-6 and SR-10 with Fuel 813J and 62-Octane Gasoline on Synthetic Rubber Compounds. No. 135, August, p. 33.

G

**Gasoline**
A Comparison of the Effect of Reference Fuels SR-6 and SR-10 with Fuel 813J and 62-Octane Gasoline on Synthetic Rubber Compounds. No. 135, August, p. 33.
Determination of Gum Values by the I.P.T. and A.S.T.M. Air Jet Gum Methods—E. L. Walters and D. L. Yabroff. No. 135, August, p. 40.

**Glass**
Glass—A Summary of Its Development as an Art and as a Science—F. C. Flint. No. 132, January, p. 19.

**Gum Values**
Determination of Gum Values by the I.P.-T. and A.S.T.M. Air Jet Gum Methods—E. L. Walters and D. L. Yabroff. No. 135, August, p. 40.

H & I

**Heat Distortion Recorder**
An Automatic Heat Distortion Recorder for Plastics—George A. Heirholzer and R. F. Boyer. No. 134, May, p. 37.

**Immersion Testing**
A Variable Cycle Alternate Immersion Corrosion Testing Machine—C. H. Mahoney, A. L. Tarr, and K. A. Skeie. No. 133, March, p. 16.

**Industrial Waters**
Proposed Methods for Determination of Dissolved Oxygen in Industrial Waters. No. 137, December, p. 19.

L

**Laminated Plastics**
The Effect of Width and of Span-Depth Ratio on the Flexural Strength of Laminated Plastics—E. M. Schoenborn, George R. Proctor, and Jaime Carvajal. No. 134, May, p. 42.

**Life Testing**
Life Testing of Lubrication Oil—H. C. Mougey. No. 132, January, p. 15.
Relation Between Life Testing and Conventional Tests of Materials—R. E. Peterson. No. 133, March, p. 9.

**Linoleum**
A New Machine for Measuring Wear Resistance of Walkway Materials—A. W. Cizek, Jr., D. H. Kallas, and H. Nestlen. No. 132, January, p. 25. Discussion, No. 134, May, p. 62.

**Lubricants**
See **Petroleum Products.**

M

**Magnesium**
Compression Testing of Magnesium Alloy Sheet—A. A. Moore and J. C. McDonald. No. 135, August, p. 27.

**Magnetic Particle Testing**
Two Sessions Feature Symposium on Magnetic Particle Testing. No. 132, January, p. 43.

**Meetings**
Chicago District Active in War Production Conference. No. 134, May, p. 78.
Heavy Attendance at New York Meeting on Processing Materials from Petroleum. No. 132, January, p. 41.
Messrs. Bates, Mochel, and Warwick Speak at Buffalo and Cleveland Meetings. No. 134, May, p. 76.
Northern California Members Participate in Welding Meeting. No. 134, May, p. 78.
Two Sessions at Philadelphia Meeting on Stress Analysis and Modern Design Concepts. No. 134, May, p. 80.
Two Sessions Feature Symposium on Magnetic Particle Testing. No. 132, January, p. 43.

**Metal Cleaning**
Metal Cleaning: I—Indirect Performance Tests—Jay C. Harris. No. 133, March, p. 23.
Metal Cleaning: II—Soil Removal Performance Methods—Jay C. Harris. No. 136, October, p. 31.

**Mica**
Research Revolutionizes Materials—J. R. Townsend. No. 137, December, p. 9.

N

**Naval Stores**
See **Pine Oil**

**Neutralization Number**
Symposium on Neutralization Number, No. 134, May, p. 48.
Introduction—H. P. Ferguson.
Neutralization Number from the Viewpoint of the Industrial Engineer—C. L. Pope.
Neutralization Number from the Viewpoint of the Turbine Engineer—I—F. C. Linn.
Neutralization Number from the Viewpoint of the Turbine Engineer—II—G. H. von Fuchs.
Neutralization Number from the Viewpoint of the Automotive Engineer—H. R. Wolf.
A Comparison of the Salt Method with A.S.T.M. Method for Determining the Acidity of Lubricating Oils—C. M. Loane.

O

**Oils**
See also **Petroleum Products.**
The Determination of the Terpene Alcohol Content of Steam-Distilled Pine Oil—V. E. Grotlisch and H. N. Burstein. No. 132, January, p. 10.

**Oven Aging**
High Temperature Oven Aging of Oil-Resisting Synthetic Rubber Compounds—G. D. McCarthy, A. E. Juve, H. Boxser, M. Sanger, S. R. Doner, E. N. Cunningham, J. F. McWhorter, and R. H. Crossley. No. 132, January, p. 33.

P & Q

**Pack Test**
Compression Testing of Magnesium Alloy Sheet—A. A. Moore and J. C. McDonald. No. 135, August, p. 27.

**Parameter**
A Suggested New Parameter for Fatigue Strength Analysis—Victor Seliger. No. 132, January, p. 29.

**Parts and Assemblies Testing**
See **Simulated Service Testing**

**Petroleum Products**
Cooperative Committees Developing Test Methods for Lubricating Greases—T. G. Roehner. No. 133, March, p. 31.
Life Testing of Lubrication Oil—H. C. Mougey. No. 132, January, p. 15.
Past History of A.S.T.M. Lubricating Grease Test Methods—H. A. McConville. No. 133, March, p. 29.
Symposium on Neutralization Number, No. 134, May, p. 48.
Introduction—H. P. Ferguson.
Neutralization Number from the Viewpoint of the Industrial Engineer—C. L. Pope.
Neutralization Number from the Viewpoint of the Turbine Engineer—I—F. C. Linn.
Neutralization Number from the Viewpoint of the Turbine Engineer—II—G. H. von Fuchs.
Neutralization Number from the Viewpoint of the Automotive Engineer—H. R. Wolf.
A Comparison of the Salt Method with A.S.T.M. Method for Determining the Acidity of Lubricating Oils—C. M. Loane.

**pH Value**
The pH of Some Standard Buffer Solutions from 0 to 60 C. and the Calibration of Glass Electrode pH Meters—George G. Manov and S F. Acree. No. 137, December, p. 25.

**Pine Oil**
The Determination of the Terpene Alcohol Content of Steam-Distilled Pine Oil—V. E. Grotlisch and H. N. Burstein. No. 132, January, p. 10.

**Pipe**
The Manufacture of Heavy-Wall Pipe $12^{3}/_{4}$ to 24 In. Outside Diameter—E. C. Wright. No. 133, March, p. 19.

**Plastics**
An Automatic Heat Distortion Recorder for Plastics—George A. Heirholzer and R. F. Boyer. No. 134, May, p. 37.
Dimensional Stability of Plastics—Robert Burns. No. 134, May, p. 27.
The Effect of Width and of Span-Depth Ratio on the Flexural Strength of Laminated Plastics—E. M. Schoenborn, George R. Proctor, and Jaime Carvajal. No. 134, May, p. 42.
Flexural Properties of Plastics—W. A. Zinzow. No. 134, May, p. 31.
A Simplified Method for the Determination of the Specific Gravity of Wood and Plastics—E. George Stern and Paul S. Dear. No. 135, August, p. 35.

**Plywood**
The Effect of Specimen Shape on the Compressive Strength Properties of Laterally Supported Plywood Specimens—J. A. Liska. No. 133, March, p. 33.

**Portland Cement**
See **Cement.**

**President's Address**
Preparations for the Future of the A.S.-T.M.—P. H. Bates. No. 135, August, p. 17.

**Protective Coatings**
Surface Conversion Coatings—George W. Jernstedt. No. 137, December, p. 29.

**Quality Control**
Committee on Quality Control of Materials to be Organized. No. 137, December, p. 8.

R

**Radiographic Films**
General Properties of Industrial Radiographic Films—Herman E. Seemann. No. 134, May, p. 17.

**Rayon Tire Cord**
Standard Fatigue Tester for Use by the Rayon Manufacturers—Report to Committee D-13—W. H. Bradshaw. No. 136, October, p. 13.
Statistical Comparison of Rayon Tire Cord Fatigue Testing Machines—C. B. Budd and L. Larrick. No. 136, October, p. 19.

**Reference Fuels**
A Comparison of the Effect of Reference Fuels SR-6 and SR-10 with Fuel 813J and 62-Octane Gasoline on Synthetic Rubber Compounds. No. 135, August, p. 33.

**Research**
Address by C. F. Kettering. No. 137, December, p. 15.
Research Revolutionizes Materials—J. R. Townsend. No. 137, December, p. 9.

**Rubber**
See also **Synthetic Rubbers**
A Rubber Housing for Waterproofing the Bonded-Wire Strain Gage—Douglas McHenry. No. 133, March, p. 18.

S

**Salt Method**
A Comparison of the Salt Method with A.S.T.M. Method for Determining the Acidity of Lubricating Oils—C. M. Loane. No. 134, May, p. 55.

**Sand Casting Alloys**
Cast-to-Size Impact Specimens for Aluminum Sand Casting Alloys—R. A. Quadt. No. 135, August, p. 24.

**SeaBees**
Preparing for Victory with the SeaBees—Rear Admiral Lewis B. Combs. No. 135, August, p. 11.

**Ship Tests**
Practical Electric Resistance Strain Gage Procedures for Structural Tests on Ships—W. V. Bassett. No. 134, May, p. 9. Discussion, No. 136, October, p. 42.

**Shipping Containers**
Intensified Work on Shipping Containers Gets Under Way. No. 133, March, p. 43.

**Simulated Service Testing**
Relation Between Life Testing and Conventional Tests of Materials—R. E. Peterson. No. 133, March, p. 9.
Testing of Materials Parts and Assemblies in Actual or Simulated Service Conditions. No. 133, March, p. 7; No. 134, May, p. 7.

**Soap**
See **Cleaners.**

**Soil Removal**
Metal Cleaning: II—Soil Removal Performance Methods—Jay C. Harris. No. 136, October, p. 31.

**Soils**
A New Method for the Mechanical Analysis of Soils—Raul Valle-Rodas. No. 135, August, p. 44.

**Specific Gravity**
A Simplified Method for the Determination of the Specific Gravity of Wood and Plastics—E. George Stern and Paul S. Dear. No. 135, August, p. 35.

**Standards and Standardization**
Address by C. F. Kettering. No. 137, December, p. 15.
Annual Meeting Acts on Standards, Bylaws. No. 135, August, p. 5.
Continuing Actions on Standards. No. 132, January, p. 7.
List with Serial Designations of New and Extensively Revised Tentative Standards. No. 135, August, p. 55.
Many Important Current Activities in Technical Committees Particularly on Standardization. No. 135, August, p. 60.
Many New Tentatives Accepted—Revisions Also Approved. No. 135, August, p. 6.
New Actions on Standards. No. 133, March, p. 6.
Research Revolutionizes Materials—J. R. Townsend. No. 137, December, p. 9.
The Role of Specifications in the Winning of a War—J. R. Townsend. No. 136, October, p. 44.
Several New Specifications and Testing Procedures Accepted. No. 136, October, p. 5.
Society to Extend Its Standardization Activities in Field of Ultimate Consumer Goods. No. 133, March, p. 5.
Statistics on Committees and Standards. No. 137, December, p. 50.

**Strain Gage**
Practical Electric Resistance Strain Gage Procedures for Structural Tests on Ships—W. V. Bassett. No. 134, May, p. 9. Discussion, No. 136, October, p. 42.
A Rubber Housing for Waterproofing the Bonded-Wire Strain Gage—Douglas McHenry. No. 133, March, p. 18.

**Stress Analysis**
Practical Electric Resistance Strain Gage Procedures for Structural Tests on Ships—W. V. Bassett. No. 134, May, p. 9. Discussion, No. 136, October, p. 42.
A Suggested New Parameter for Fatigue Strength Analysis—Victor Seliger. No. 132, January, p. 29.

**Surface-Conversion**
Surface-Conversion Coatings—George W. Jernstedt. No. 137, December, p. 29.

**Synthetic Rubber**
A Comparison of the Effect of Reference Fuels SR-6 and SR-10 with Fuel 813J and 62-Octane Gasoline on Synthetic Rubber Compounds. No. 135, August, p. 33.
High Temperature Oven Aging of Oil-Resisting Synthetic Rubber Compounds—G. D. McCarthy, A. E. Juve, H. Boxser, M. Sanger, S. R. Doner, E. N. Cunningham, J. F. McWhorter, and R. H. Crossley. No. 132, January, p. 33.

T

**Teak Wood**
A New Machine for Measuring Wear Resistance of Walkway Materials—A W. Cizek, Jr., D. H. Kallas, and H. Nestlen. No. 132, January, p. 25. Discussion, No. 134, May, p. 62.

**Terpene Alcohol Content**
The Determination of the Terpene Alcohol Content of Steam-Distilled Pine Oil—V. E. Grotlisch and H. N. Burstein. No. 132, January, p. 10.

**Test Specimens**
Cast-to-Size Impact Specimens for Aluminum Sand Casting Alloys—R. A. Quadt. No. 135, August, p. 24.
The Effect of Specimen Shape on the Compressive Strength Properties of Laterally Supported Plywood Specimens—J. A. Liska. No. 133, March, p. 33.
The Effect of Width and of Span-Depth Ratio on the Flexural Strength of Laminated Plastics—E. M. Schoenborn, George R. Proctor, and Jaime Carvajal. No. 134, May, p. 42.

**Textiles**
Comparative Fatigue Test Data—C. S. Venable. No. 136, October, p. 17.
Standard Fatigue Tester for Use by the Rayon Manufacturers—Report to Committee D-13—W. H. Bradshaw. No. 136, October, p. 13.
Statistical Comparison of Rayon Tire Cord Fatigue Testing Machines—C. B. Budd and L. Larrick. No. 136, October, p. 19.
A Suggested Method for Thorough Testing of Antiseptic Fabrics—Louis C. Barail No. 136, October, p. 25.
Tomorrow's Textiles—Yesterday's Test Methods—J. B. Goldberg. No. 135, August, p. 47.

**Thickness Gage**
A New Coating Thickness Gage—S. Lipson. No. 135, August, p. 20.

**Timber**
See **Wood.**

**Tire Fabric**
Comparative Fatigue Test Data—C. S. Venable. No. 136, October, p. 17.
Statistical Comparison of Rayon Tire Cord Fatigue Testing Machines—C. B. Budd and L. Larrick. No. 136, October, p. 19.
Standard Fatigue Tester for Use by the Rayon Manufacturers—Report to Committee D-13—W. H. Bradshaw. No. 136, October, p. 13.

**Tires**
An Automotive Tire Fatigue Machine—John N. Kenyon. No. 136, October, p. 9.

V, W & X

**Vinsol Resin**
Effect of Heat on Portland Cements Containing Vinsol Resin—Leonard Bean and Albert Litvin. No. 135, August, p. 30.

**Walkway Materials**
A New Machine for Measuring Wear Resistance of Walkway Materials—A. W. Cizek, Jr., D. H. Kallas, and H. Nestlen. No. 132, January, p. 25. Discussion, No. 134, May, p. 62.

**Water**
Proposed Methods for Determination of Dissolved Oxygen in Industrial Waters. No. 137, December, p. 19.

**Waterproofing**
A Rubber Housing for Waterproofing the Bonded-Wire Strain Gage—Douglas McHenry. No. 133, March, p. 18.

**Wear**
A New Machine for Measuring Wear Resistance of Walkway Materials—A. W. Cizek, Jr., D. H. Kallas, and H. Nestlen. No. 132, January, p. 25. Discussion, No. 134, May, p. 62.

**Wood**
The Effect of Specimen Shape on the Compressive Strength Properties of Laterally Supported Plywood Specimens—J. A. Liska. No. 133, March, p. 33.
A Simplified Method for the Determination of the Specific Gravity of Wood and Plastics—E. George Stern and Paul S. Dear. No. 135, August, p. 35.
Some Factors in the Interpretation of Small-Scale Tests for Fire-Retardant Wood—F. W. Gottschalk. No. 136, October, p. 40.

**X-ray**
General Properties of Industrial Radiographic Films—Herman E. Seemann. No. 134, May, p. 17.
X-ray Diffraction Data for Chemical Analysis. No. 135, August, p. 64.

# Index to Authors of Technical Papers

## 1945 ASTM Bulletins

While this Author Index does not list authors according to alphabetic sequence and the titles of some of the papers are condensed, it is believed the information as presented will be of service. Further details are given in the Subject Index.

**January 1945—No. 132**

V. E. Grotlisch and H. N. Burstein—The Determination of the Terpene Alcohol Content of Steam-Distilled Pine Oil
H. C. Mougey—Life Testing of Lubrication Oil
F. C. Flint—Glass—A Summary of Its Development as an Art and as a Science
A. W. Cizek, Jr., D. H. Kallas, and H. Nestlen—A New Machine for Measuring Wear Resistance of Walkway Materials
Victor Seliger—A Suggested New Parameter for Fatigue Strength Analysis
G. D. McCarthy, A. E. Juve, H. Boxser, M. Sanger, S. R. Doner, E. N. Cunningham, J. F. McWhorter, and R. H. Crossley—High Temperature Oven Aging of Oil-Resisting Synthetic Rubber Compounds

**March 1945—No. 133**

R. E. Peterson—Relation Between Life Testing and Conventional Tests of Materials
C. H. Mahoney, A. L. Tarr, and K. A. Skeie—A Variable Cycle Alternate Immersion Corrosion Testing Machine
Douglas McHenry—A Rubber Housing for Waterproofing the Bonded-Wire Strain Gage
E. C. Wright—The Manufacture of Heavy-Wall Pipe
Frank N. Speller—Memo on Cavitation
Jay C. Harris—Metal Cleaning: I—Indirect Performance Tests
H. A. McConville—A.S.T.M. Lubricating Grease Test Methods
T. G. Roehner—Developing Test Methods for Lubricating Greases
J. A. Liska—The Effect of Specimen Shape on the Compressive Strength Properties of Plywood Specimens

**May 1945—No. 134**

W. V. Bassett—Strain Gage Procedures for Structural Tests on Ships
Herman E. Seemann—General Properties of Industrial Radiographic Films
Robert Burns—Dimensional Stability of Plastics
W. A. Zinzow—Flexural Properties of Plastics
George A. Heirholzer and R. F. Boyer—An Automatic Heat Distortion Recorder for Plastics
E. M. Schoenborn, George R. Proctor, and Jaime Carvajal—The Flexural Strength of Laminated Plastics
H. P. Ferguson, C. L. Pope, F. C. Linn, G. H. von Fuchs, H. R. Wolf, C. M. Loane—Symposium on Neutralization Number
L. F. Roehmann—Electrical Conductivity of Conductors

**August 1945—No. 135**

Rear Admiral Lewis B. Combs—Preparing for Victory with the Sea-Bees
P. H. Bates, President's Address—Preparations for the Future of the A.S.T.M.
S. Lipson—A New Coating Thickness Gage
R. A. Quadt—Impact Specimens for Aluminum Sand Casting Alloys
A. A. Moore and J. C. McDonald—Compression Testing of Magnesium Alloy Sheet
Leonard Bean and Albert Litvin—Effect of Heat on Portland Cements Containing Vinsol Resin
E. George Stern and Paul S. Dear—Determination of the Specific Gravity of Wood and Plastics
E. L. Walters and D. L. Yabroff—Determination of Gum Values by the I.P.T. and A.S.T.M. Air Jet Gum Methods
Raul Valle-Rodas—A New Method for the Mechanical Analysis of Soils
J. B. Goldberg—Tomorrow's Textiles—Yesterday's Test Methods

**October 1945—No. 136**

John N. Kenyon—An Automotive Tire Fatigue Machine
W. H. Bradshaw—Standard Fatigue Tester for Use by the Rayon Manufacturers
C. S. Venable—Comparative Fatigue Test Data
C. B. Budd and L. Larrick—Statistical Comparison of Rayon Tire Cord Fatigue Testing Machines
Louis C. Barail—A Suggested Method for Thorough Testing of Antiseptic Fabrics
Jay C. Harris—Metal Cleaning: II—Soil Removal Performance Methods
F. W. Gottschalk—Interpretation of Small-Scale Tests for Fire-Retardant Wood

**December 1945—No. 137**

J. R. Townsend—Research Revolutionizes Materials
C. F. Kettering—An Address on Standards, Research, etc.
Committee D-19—Determination of Dissolved Oxygen in Industrial Waters
George G. Manov and S. F. Acree—The pH of Some Standard Buffer Solutions and the Calibration of Glass Electrode pH Meters
George W. Jernstedt—Surface-Conversion Coatings
